

# JIGSAW PUZZLE

Front view						
Overhead view						
Side view						

Complete the following table by putting the number of every view in the appropriate cell.

1	2	3	4	5	6
7	8	9	10	11	12
13	14	15	16	17	18

Once you have finished, you have to paint the 6 pieces and the 18 views.

You have to use three different colors. Use a color for what you see from the front views, a second color for the overhead views and finally a third color for the side views.

You are not going to be able to paint properly two of the pieces. Why?
